

# Revvo in the LAST MILE

## 🕒 REDUCE DOWNTIME BY 50%

Tires are kept at their peak performance with continuous AI monitoring. Tire-related problems are cut down by 50% with preemptive AI-powered alerts.

## 🔧 IMPROVED PERFORMANCE

Better performance is expected from well-maintained tires. Improved performance correlates to increased productivity.

## 🔍 REDUCE INSPECTION TIME BY 90%

Revvo automates the tire checking process of technicians and routinely runs the check with less time than a manual check requires.

## 📈 LONGER LASTING TIRES

Tires last longer when they are adequately monitored and maintained. Addressing critical tire metrics such as pressure, temperature, and wear can improve the life of tires.

## 🌙 24/7 MONITORING

Assess, analyze, and record the current status of tires to monitor tire health, longevity, and road conditions.

## 🔄 INCREASED REPLACEMENT EFFICIENCY

Real-time data collection from each tire is used to provide relevant and optimal maintenance recommendations.
